MISSION STATEMENT

The promotion of health through assessing community need, facilitating health policy development, and the assurance of quality health services for the community.

VISION STATEMENT

Providing leadership and structure in community health planning, enhanced partnering with diverse community groups in advancing the goals of Public Health, maintaining surveillance in the prevention of disease, injury and disability, efficient and effective regulation and enforcement through strong health codes and ordinances, an ability to collect, analyze and disseminate relevant health data and information, informing, education and empowering people with health issues, evaluating the accessibility and availability of personal and population- based services, and a focus on primary prevention in all programmatic activities.

SERVICES PROVIDED

The Adams County Health Department was established by county referendum in 1944, and is state certified. The Adams County Health Department offers programs which reach all the residents and visitors of Adams County. Services offered by the Health Department are population-based and are designed to assure that needed health services are available to all Adams County residents.

Some of the current services offered by the Health Department include: maternal child health, WIC, Dental Services for the medically indigent population, women's health, drug free communities, vital statistics, food, water and sewage programs, solid waste, STD and CD surveillance prevention and treatment.
